PROFESSIONAL SUMMERY

Accomplished Tech Lead and Full-stack Developer with extensive experience in a wide range of technologies, including but not limited to ReactJS, React Native, Laravel, and data engineering. Over the years, I have developed a high level of proficiency in JavaScript, Node.js, and various modern web development tools such as MongoDB, Redis, WebSockets, and Elasticsearch. My skill set enables me to implement cutting-edge information technology solutions and create magical web experiences that delight users and meet business objectives. With a proven track record, I excel in leading software development life cycles from inception through deployment, ensuring that each project I am involved in is completed to the highest standards. My experience includes architecting complex enterprise solutions that address intricate business needs, as well as inspiring and mentoring teams of software engineers to achieve their full potential. My leadership style focuses on fostering collaboration, innovation, and continuous improvement, which has consistently led to successful project outcomes and satisfied stakeholders.

CORE COMPETENCIES

- JavaScript & Node.js Development
- ReactJS & React Native Development
- Full-stack Web & Mobile Development
- Software Architecture & Design
- Data Engineering & Analysis
- Team Leadership & Mentoring
- Agile Methodologies
- Performance Optimization
- API Design & Integration
- Caching Technologies, MongoDB & Redis
- WebSockets & Real-time Data Processing using Laravel Reverb (Fast and Scalable WebSockets for Applications)
- Elasticsearch and other search indexing technologies for fast and efficient full-text search in applications (Laravel Scout)

WORK EXPERIENCE

TECHNICAL LEAD

EJADA -Alrajhi Bank | Jul 2022 - Present

Lead the Software Development Life Cycle for web and mobile applications with a focus on JavaScript, ReactJS, and React Native development.

KEY RESPONSIBILITIES:

- Architect, design, and implement complex enterprise software solutions using ReactJS, React Native, and Node.js
- Lead and facilitate meetings with clients, users, and the development team to ensure project alignment and client satisfaction
- Design and develop fully normalized MySQL / PostgreSQL databases, and integrate MongoDB for scalable data solutions
- Implement best practices in React architecture, modernize existing applications, and optimize performance
- Develop custom solutions with PHP backends and integrate Redis for caching and real-time data management
- Utilize WebSockets for building real-time features and enhance user experiences
- Estimate work content, achieve planned timelines, and manage project resources effectively
- Enforce coding standards and deliver high-quality services to clients
- Scale solutions to meet client goals and budgets
